

PI0 AAF Case UserManual

1. General Description:

Innomaker Pi0 AAF Case is designed for DAC MINI/AMP PRO MINI and most of Raspberry Pi Zero add-on hat with Raspberry Pi0(Only). It's a passive aluminum alloy Case with heat sink.

2. Features

1. [Passive Cooling with Large Heat Sink] High-quality aluminum alloy case with built-in heat sink and ventilation design ensures optimal heat dissipation, keeping your Raspberry Pi Zero cool even under heavy workloads.
2. [Spacious & Open Design] Features an open USB side and ample internal space, allowing easy installation and compatibility with most Pi Zero expansion boards and wiring.
3. [Smart Fan Control (Raspbian Supported)] Built-in fan automatically adjusts speed based on CPU temperature in Raspbian (other OS may require manual programming for optimal performance).
4. [Compatible with InnoMaker DAC MINI/AMP PRO MINI] Perfect fit for InnoMaker expansion boards; other Pi Zero HATs may require screw adjustments for full compatibility.
5. [Includes User Manual & GitHub Support] Comes with a detailed user manual and access to online support via GitHub for troubleshooting and customization.

3. Installation Guide

Upon receiving the goods, locate the six sets of screws 1, 2, 3, 4, 5, 6 and 7. Then, install them according to the diagram shown below.
